

## How to use Onia

- 1 Pls push the power button of the mainframe for about 3 seconds. When the red light on the back lights up, Onia is switched on and Bluetooth is active

- 2 Pls charge the battery upto the full condition by connecting the enclosed Micro USB cable to the Onia light. The color of the right side indicating light located at the back is changed into blue if the charge is completed.

※ To save power and to turn off the lamp (e.g. when transporting), press the on/off button as described under item 1. for about 3 seconds. To activate the lamp, press the power button again for 3 seconds - the lamp is on and Bluetooth is active.

- 3 The color of the upper and lower light cube changes by touching the buttons.

- 4 By pressing the AUTO button, the colors of the upper and lower cube automatically changes. By pressing of the AUTO button for about 3 seconds all buttons are locked and the lamp is no longer operable. By pressing for 3 seconds again, all buttons are unlocked. When the lock function is activated, the control light on the left backside of the Onia lights up purple (violet).
